

REMARKS

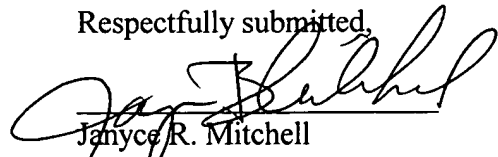

This amendment is made to more particularly claim the present invention. Claims 1-20 are pending in the present Application. Applicant has amended claims 1, 5, 7, 11, 14 and 18. Applicant has added claims 21-23. Consequently, claims 1-23 remain pending in the present Application.

Applicant has amended claims 1, 7 and 14 to remove the phrase "in response to a request from the web browser." Applicant has also amended claim 1 to remove a specific element relating to a message cache. Consequently, Applicant respectfully submits that the scope of claims 1, 7 and 14 has not been narrowed. Applicant added claims 21, 22 and 23, which depend upon claims 1, 7, and 14, respectively, and to include the phrase "in response to a request from the web browser." Support for new claims 21-23 can be found in the specification, page 8, line 21-page 9, line 1. Applicant has also amended claims 5, 14 and 18 to ensure that each term in claims 5, 14 and 18 has proper antecedent basis. Consequently, Applicant respectfully submits that the scope of claims 5, 14 and 18 has not been narrowed. Applicant also respectfully submits that no new matter has been added.

Consequently, Applicant respectfully requests allowance of the claims as currently presented. Applicant's attorney believes that this application is in condition for allowance. Should any unresolved issue remain, the Examiner is invited to call Applicant's attorney at the telephone number indicated below.

Attached hereto and captioned "Version with Markings to Show Changes Made" is a marked-up version of the changes made to the claims by the current amendment.

Respectfully submitted,

Janyce R. Mitchell

Sawyer Law Group LLP

Attorney for Applicant(s)

Reg. No. 40,095

(650) 493-4540

VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

1. (Amended) A system for publishing a message using a page builder tool, the page builder tool for providing a web page and linking the web page to a searchable database, the system comprising:

a message caching agent for receiving the message;

[a message cache coupled to the message caching agent for storing the message, the message cache receiving the message from the message caching agent;]

a message publishing agent coupled to the message cache and the page builder tool, the message publishing agent for retrieving the message from the message cache and allowing the message to be published on a web browser through the page builder tool[in response to a request from the web browser].

5. (Amended) The system of claim 1 further comprising:

a message publishing macro definition, coupled to the page builder tool, the message publishing macro definition being processed by the page builder tool in response to [the]a request from the web browser, the message publishing macro definition for triggering publishing of the message in response to processing of the message publishing macro definition by the page builder tool.

7. (Amended) A method for publishing a message using a page builder tool, the page builder tool for providing a web page and linking the web page to a searchable database, the method comprising the steps of:

- (a) receiving a message from a user;
- (b) storing the message in a message cache connected to the page builder tool;
- (c) retrieving the message from the message cache and publishing the message on a web browser through the page builder tool[in response to a request from the web browser].

11. (Amended) The method of claim 8 wherein the retrieving and publishing step (c) further includes the steps of:

- (c1) triggering the message publishing agent to retrieve and publish the message using a message publishing macro definition coupled to the page builder tool, the message publishing macro definition being processed by the page builder tool in response to [the]a request from the web browser, the message publishing macro definition for triggering publishing of the message in response to processing of the message publishing macro definition by the page builder tool.

14. (Amended) A computer-readable medium containing a program for publishing a message using a page builder tool, the page builder tool for providing a web page and linking the web page to a searchable database, the program including instructions for:

- (a) receiving a message from a user;
- (b) storing the message in a cache connected to the page builder tool;
- (c) retrieving the message from the message cache and publishing the message on a web browser through the page builder tool[in response to a request from the web browser].

18. (Amended) The computer-readable medium of claim 15 wherein the retrieving and publishing instructions (c) further include instructions for:

- (c1) triggering the message publishing agent to retrieve and publish the message using

a message publishing macro definition coupled to the page builder tool, the message publishing macro definition being processed by the page builder tool in response to [the]a request from the web browser, the message publishing macro definition for triggering publishing of the message in response to processing of the message publishing macro definition by the page builder tool.
